Dear Josh,

I cannot find the paper on the interconvertible forms of tryptophanyl-sRNA in E. coli by Gartland and Sueoka. Possibly the paper has been published in a volume of PNAS now at the binder. It has appeared, however, as IEG 7 number 257.

I am enclosing the reference on the different behaviour of sRNA's from aminoacyl-sRNA and from peptidyl-sRNA.

I hope that you had a pleasant return trip. At Malpensa Paola and I parked the car and tried to find you. Probably, you had already left for the passengers' lounge.

We all enjoyed your visit though we regret that it lasted so little.

Ciao
